

# Product Manager - BeeGFS

**Location:** Remote or Hybrid (Preferred: Germany)

## Bee part of the Swarm.

Do you want to be part of a company that is a hive of activity?

At ThinkParQ, we're an enthusiastic and passionate international team helping our customers maximize the value of their data by developing some of the fastest, scalable, flexible, and robust products and solutions for all performance-oriented environments including HPC, AI and Deep Learning, Life Sciences and Oil & Gas.

### Role Overview:

As the **Product Manager for BeeGFS**, you will define product strategy, collaborate with engineering and business teams, and ensure that BeeGFS continues to deliver unmatched performance and scalability for HPC, AI, and enterprise workloads. You will bridge technical development and market needs, driving innovation while ensuring seamless customer adoption.

### Key Responsibilities:

- Define and execute the product roadmap for BeeGFS, aligning with company goals and market trends.
- Gather and prioritise customer requirements, working closely with HPC users, enterprises, and research institutions.
- Collaborate with engineering to develop new features, optimise performance, and enhance scalability.
- Drive go-to-market strategies, including pricing, positioning, and messaging.
- Support sales and business development by providing technical insights and product expertise.
- Monitor industry trends, competitor offerings, and emerging technologies in the parallel file system and AI & HPC storage domain.
- Represent the company at industry events, conferences, and customer meetings.
- Manage product development for both on-premise and cloud-based BeeGFS deployments.
- Work with cloud providers to optimise BeeGFS performance and integration in cloud environments.
- Develop and implement hybrid storage strategies that balance cloud and on-premise infrastructures.

### Qualifications:

- Bachelor's or Master's degree in Computer Science, Engineering, or a related field.
- 5+ years of relevant work experience, preferably in HPC, storage, or enterprise software.
- Strong understanding of file systems, parallel storage, and data management.
- Familiarity with BeeGFS, Lustre, GPFS, or similar technologies is highly desirable.
- Experience with on-premise and cloud storage solutions, including integration with cloud platforms (AWS, Azure, Google Cloud).
- Ability to balance technical knowledge with business strategy.
- Excellent communication skills, both written and verbal.
- Experience working in cross-functional teams with engineers, sales, and marketing

### Why Join Us?

- Work on cutting-edge AI & HPC storage technology with a global impact.
- Be part of a dynamic, fast-growing company with a collaborative culture.
- Competitive salary and benefits package.
- Opportunity to shape the future of BeeGFS and drive innovation in high-performance storage.

If you are passionate about AI & HPC storage, data management, and driving product innovation, we'd love to hear from you! **Please send your resume and a brief cover letter to [hr@thinkparq.com](mailto:hr@thinkparq.com).** Join us and help shape the future of parallel storage with BeeGFS!
